QUARTERLY JOURNAL

OF THE

Royal Meteorological Society

Editor :

R. J. MURGATROYD

Vol. **92**, 1966

LONDON :
ROYAL METEOROLOGICAL SOCIETY
49 CROMWELL ROAD, LONDON, S.W.7
1966

CONTENTS OF VOLUME **92**

PAGE

K. A. Browning—The lobe structure of giant hailstones 1

P. G. F. Caton—Raindrop-size distributions in the free atmosphere 15

T. W. Harrold—Measurement of horizontal convergence in precipitation using a Doppler radar 31

R. E. Newell, J. R. Mahoney and R. W. Lenhard Jr.—Small-scale wind variations in the stratosphere and mesosphere 41

D. B. Shaw—Computation of heat sources and sinks in the atmosphere 55

C. D. Rodgers and C. D. Walshaw—The computation of infra-red cooling rate in planetary atmospheres 67

J. T. Bartlett—The growth of cloud droplets by coalescence 93

S. G. Cornford—A note on some measurements from aircraft of precipitation within frontal clouds 105

E. B. Kraus and R. E. Morrison—Local interactions between the sea and the air at monthly and annual time scales 114

G. Stanhill, G. F. Hofstede and J. D. Kalma—Radiation balance of natural and agricultural vegetation 128

Shorter Contributions—

K. L. Calder—Concerning the similarity theory of Monin/Obukhov 141

D. O. Staley—The lapse rate of temperature following an air parcel 147

K. O. L. F. Jayaweera and B. J. Mason—The falling motions of loaded cylinders and discs simulating snow crystals 151

E. Palmén—On the interhemispheric mass circulation across the Equator 157

D. G. Murcray, F. H. Murcray and W. J. Williams—Further data concerning the distribution of water vapour in the stratosphere 159

J. D. Coleman and D. M. Farrar—Soil moisture deficit and water-table depth in London clay beneath neutral grassland 162

Correspondence—

G. W. Brier, G. O'Mahony—Rainfall and moon phase 169

Discussions—

J. D. Woods and B. J. Mason—Experimental determination of collection efficiencies for small water droplets in air (*Q.J.*, **90**, p. 373); The wake capture of water drops in air (*Q.J.*, **91**, p. 35), with communicated contributions by J. W. Telford and M. Neiburger 171

P. B. MacCready Jr. and A. Proudfit—Observations of hydrometeor charge evolution in thunderstorms (*Q.J.*, **91**, p. 44); Self-charging of melting ice (*Q.J.*, **91**, p. 54) 175

Proceedings at meetings of the Society 177

Reviews—

Radiative heat exchange in the atmosphere, K. Ya. Kondrat'yev (J.T.H.); *Barrier waves in the atmosphere*, Sh. A. Musaelyan (G.A.C.); *Elements of cloud physics*, H. R. Byers (J.H.); *Satellite environment handbook*, (Ed.) F. S. Johnson (R.J.M.); *The Gulf Stream*: a physical and dynamical description, H. Stommel (R.F.M.H.) 180

Obituary Notices 183

F. Pasquill—Lagrangian similarity and vertical diffusion from a source at ground level 185

R. F. Zobel—Temperature and humidity changes in the lowest few thousand feet of atmosphere 196

J. S. A. Green, F. H. Ludlam and J. F. R. McIlveen—Isentropic relative-flow analysis and the parcel theory 210

R. T. H. Collis—Lidar : a new atmospheric probe 220

D. Djurić—The role of deformation in the large-scale dispersion of clusters 231

S. Y. W. Tse—A new method for the prediction of typhoon movement using the 700 mb chart 239

J. L. Monteith—Local differences in the attenuation of solar radiation over Britain .. 254

Shorter Contributions—

G. D. Robinson—Some determinations of atmospheric absorption by measurement of solar radiation 263

N. Thompson—The estimation of vertical diffusion over medium distances of travel .. 270

G. Dale Hess and H. A. Panofsky—The budget of turbulent energy near the ground .. 277

J. T. Houghton—The effect of contamination on spectroscopic determinations of stratospheric water vapour 281

G. W. Brier—Evidence for a longer period tidal oscillation in the tropical atmosphere.. 284

A. E. Carte—Features of Transvaal hailstorms 290

W. C. Macklin and I. H. Bailey—On the critical liquid water concentrations of large hailstones 297

J. H. Gee—An approximate treatment of the effect of thermal stability on turbulent diffusion 301

Correspondence—

C. M. Botley, H. H. Lamb—Solar activity in the 1600's 306

E. Kessler—Lightning discharge and precipitation 308

Discussions—

S. Chapman and P. C. Kendall—Noctilucent clouds and thermospheric dust : their diffusion and height distribution (*Q.J.*, **91**, p. 115) 311

J. B. Stewart—Precipitation from layer cloud (*Q.J.*, **90**, p. 287) 313

Proceedings at meetings of the Society 314

Reviews—

Report of the Meteorological Office, 1964 (H.L.P.); *The origin and evolution of atmospheres and oceans*, Eds. P. J. Brancazio, A. G. W. Cameron, (P.A.S.); *Klimaschwankungen und grossräumige Klimabeeinflussung*, H. Flohn (G.M.); *Rayonnement solaire et échanges radiatifs naturels*, Ch. Perrin de Brichambaut (G.D.R.); *Cloud physics and cloud seeding*, L. J. Battan (J.B.S.); *The upper atmosphere : Meteorology and physics*, R. A. Craig (R.J.M.); *Weather eyes in the sky : America's meteorological satellites*, J. G. Vaeth (D.G.J.); *Investigation of the bottom 300 m layer of the atmosphere*, Ed. N. L. Byzova (M.J.B.); *The climate of London*, T. J. Chandler (J.H.B.); *Climates of the U.S.S.R.*, A. A. Borisov (A.G.F.); *Descriptive physical oceanography*, G. L. Pickard (H.C.); *Physics of the marine atmosphere*, H. U. Roll (H.C.) 317

Obituary Notice 323

F. P. Bretherton—Critical layer instability in baroclinic flows 325

F. P. Bretherton—Baroclinic instability and the short wavelength cut-off in terms of potential vorticity 335

P. M. Hamilton—Vertical profiles of total precipitation in shower situations .. 346

R. N. Kulkarni—The vertical distributions of atmospheric ozone and possible transport mechanisms in the stratosphere of the Southern Hemisphere 363

T. H. Kirk—Some aspects of the theory of fronts and frontal analysis 374

A. E. Carte and R. E. Kidder—Transvaal hailstones 382

Shorter Contributions—

R. A. McCormick and K. R. Kurfis—Vertical diffusion of aerosols over a city .. 392

F. R. Payne and J. L. Lumley—One-dimensional spectra derived from an airborne hot-wire anemometer 397

R. R. Waldo Lewis and R. Murray—The limitations of analogues selected from sequences of daily weather types over the British Isles 402

J. Latham, R. B. Freisen and R. E. Mystrom—Charge transfer between rigid spheres separated in an electric field 407

E. R. Walker—Cross-arc deposit of particles from continuous and instantaneous sources 411

Correspondence—

A. W. Brewer, K. P. B. Thomson and A. W. Wilson—Scattered ultraviolet light in the stratosphere 415

Discussions—

W. C. Swinbank—The exponential wind profile (*Q.J.*, **90**, p. 119) 416

F. B. Smith—The role of wind shear in horizontal diffusion of ambient particles (*Q.J.*, **91**, p. 318) 427

J. B. Tyldesley and C. E. Wallington—The effect of wind shear on horizontal dispersion (*Q.J.*, **91**, p. 158) 427

J. H. Gee and D. R. Davies—A further note on horizontal dispersion from an instantaneous ground source (*Q.J.*, **90**, p. 478). 427

Report of the Council for 1965 431

Proceedings at meetings of the Society 444

Reviews—

Objective analysis of meteorological fields, L. S. Gandin (G.A.C.); *Strömungslehre*, L. Prandtl (T.H.E.); *Introduction to the atmosphere*, H. Riehl (J.B.R.); *Meteorology and climatology for sixth-forms and beyond*, E. S. Gates (D.M.H.); *Weather elements*, T. A. Blair and R. C. Fite (D.M.H.); *The biological significance of climate changes in Britain*, (Eds.) C. G. Johnson and L. P. Smith (G.M.); *Particle size – Theory and industrial applications*, R. D. Cadle (A.C.C.) 447

Obituary Notices 450

G. D. Robinson—Another look at some problems of the air-sea interface 451

F. P. Bretherton—The propagation of groups of internal gravity waves in shear flow 466

J. M. Wallace and R. E. Newell—Eddy fluxes and the biennial stratospheric oscillation 481

J. R. Starr and B. J. Mason—The capture of airborne particles by water drops and simulated snow flakes.. 490

J. C. Drake and B. J. Mason—The melting of small ice spheres and cones 500

P. L. Kamburova and F. H. Ludlam—Rainfall evaporation in thunderstorm downdraughts 510

F. A. Record and H. E. Cramer—Energy dissipation rates and the budget of turbulent kinetic energy in the atmospheric surface layer 519

A. B. Bernstein—Examination of certain terms appearing in Reynolds' equations under unsteady conditions and their implications for micrometeorology 533

Shorter Contributions—

R. G. Barry and R. E. Chambers—A preliminary map of summer albedo over England and Wales 543

G. M. B. Dobson—Annual variation of ozone in Antarctica 549

A. Woodroffe—Objective analysis of the 100 mb level 553

A. B. Bernstein—A new dimensional approach to the problem of flux-gradient relationship near the ground 560

C. J. Sumner—A sunshine sensing device for long period recording.. 567

Discussions—

T. V. Crawford—Moisture transfer in free and forced convection (*Q.J.*, **91**, p. 18) .. 570

D. R. Grant—Some aspects of convection as measured from aircraft (*Q.J.*, **91**, p. 268).. 574

S. D. R. Wilson—Instability in a geostrophic wind with a transverse wind-speed gradient (*Q.J.*, **91**, p. 132) 576

P. G. F. Caton—A study of raindrop-size distributions in the free atmosphere (*Q.J.*, **92**, p. 15) 577

T. W. Harrold—Measurement of horizontal convergence in precipitation using a Doppler radar – a case study (*Q.J.*, **92**, p. 31) 579

S. G. Cornford—A note on some measurements from aircraft of precipitation within frontal clouds (*Q.J.*, **92**, p. 105) 581

G. P. Williams and D. R. Davies—A mean motion model of the general circulation (*Q.J.*, **91**, p. 471) 582

Proceedings at meetings of the Society 584

Reviews—

Physical climatology, W. D. Sellers (A.G.); *Meteorological Satellites*, W. K. Widger, Jr. (D.G.J.); *Ultra high frequency propagation*, H. R. Reed and C. M. Russell (R.F.J.); *Problems of atmospheric and space electricity*, Ed. S. C. Coriniti (J.H.); *Weather studies*, L. P. Smith (J.B.R.); *Applied climatology*, J. F. Griffiths (C.I.J.); *A history of the theories of rain and other forms of precipitation*, W. E. K. Middleton (R.F.J.); *Physics of the atmosphere*, P. N. Tverskoi (R.F.) 588
